- Housing, Shelter and Transportation.
- Legal, Immigration and Criminal Services.
- Mental Health and Counseling Services.
- Self Help Groups and Services.
- Senior and Disability Services.

3-1-1 (Non-Emergency Reporting)

Examples of non-emergency calls

Music complaint

Parking violations

5-1-1 (Traffic Information)

511 is your one-stop phone and web source for up-to-the-minute transportation information. It's FREE and available whenever you need it – 24/7 – from anywhere in the nine-county Bay Area.

6-1-1 (Telephone Repair)

Dial611.com - Offers comparison of telecommunications, phone services

7-1-1 CA Relay for Hearing/Speech Impaired

The FCC has reserved 7-1-1 for relay service access. Just as you can call 4-1-1 for information, as of October 1, 2001, you can dial 7-1-1 to connect to relay service anywhere in the United States. 7-1-1 makes it easier for travelers to use relay because they will not have to remember relay numbers in every state.

The number 7-1-1 is a relay number for every state in this country. When a TTY caller or a non-TTY user calls the relay number, the operator will dial the number s/he wishes to contact and relay the messages between two parties using voice and TTY.

What about 9-1-1?

- In an emergency, please don't call 7-1-1. Instead, call 9-1-1 directly. 9-1-1 centers have TTYs and are prepared to handle emergencies.

Several TTY users have admitted that they mis-dialed the number for either relay service or for emergency assistance. Sometimes they would hang up when they realized that they dialed 9-1-1 by mistake. They didn't know it is policy for a 9-1-1 center to return the call and/or even to send a police over to check on them. An article explaining that the TTY users were to stay on the line if misdialed 9-1-1 by an accident has been sent out to Deaf agencies and several newsletters in this state.

8-1-1 (Call before you dig)

Dial 811 from anywhere in the country a few days prior to digging, and your call will be routed to your local One Call Center. Tell the operator where you're planning to dig, what type of work you will be doing and your affected local utilities companies will be notified about your intent to dig. In a few days, they'll send a locator to mark the approximate location of your underground lines, pipes and cables, so you'll know what's below - and be able to dig safely.

Know what's below.
Call before you dig.
